

ABSTRACT OF THE DISCLOSURE

The present invention comprises: a strip-shaped peel sheet; a spacer sheet stuck onto the peel sheet via an adhesive layer; an upper face sheet stuck onto an upper face of the spacer sheet via an adhesive layer; and contact plates stuck to the upper face sheet, wherein, on the peel sheet and the spacer sheet, penetration holes through which the contact plates can penetrate; and coupling grooves by which adjacent penetration holes are coupled are formed, wherein, of the coupling grooves, one side of the coupling groove provided in a direction crossing a feed direction of the strip-shaped peel sheet continues to rear ends of inner circumferences of the adjacent penetration holes with respect to the feed direction of the peel sheet.
